Spyder®5

See, Share, and Print Images, Just as You Intended

As the window to your digital photography, your monitor is a tool you need to be able to trust. If your monitor color isn't accurate, how can you edit your photos properly, or get your screen to match your prints? You can't. Spyder5 will solve all of that in 5 minutes or less.

Spyder5 FEATURES AND BENEFITS

- Spyder5 calibrates your monitor to an industry color reference standard to ensure on-screen colors are accurate, grays and whites are consistent, shadow and highlight details are protected, and skin tones are true-to-life.

- Spyder5 is quick, easy and interactive, for use on laptops, desktops and front projectors.

- Guaranteed color accuracy with the industry's only patented 7-detector optical engine, making photo editing easier and providing better print matching.

- Spyder5 delivers up to 55% improved tonal response at low luminance levels versus Spyder4, resulting in more accurate shadow detail and smoother gradients.

- Compact, to fit on any screen size, and portable, with a built-in lens cap to keep optics clean.

- See "Before and After" results of your calibration on either pre-set images or on your own photos (with Pro and Elite).

BEFORE   AFTER

Spyder5 is Available in 3 Versions:

Spyder5®EXPRESS – **Easy and fast color accuracy solution**

- In just minutes, the simple 4-step process guides you through calibrating your monitor to achieve exceptional color accuracy, with improved shadow and highlight details, for better print matching.
- See the "Before and After" results of your calibration results on pre-set images.

Spyder5®PRO – **Advanced and interactive color accuracy solution**

- Fast and easy, full calibration takes only about five minutes to ensure color accuracy and less than half the time for monthly re-calibrations.
- Room light monitoring determines optimal monitor brightness so you see fine shadow detail and highlights in your photos, ensuring your edited images match your prints.
- "Before and After" evaluation of your calibration results using your own photographs, to focus on details that are important to you.

Spyder5®ELITE – **Expert color accuracy solution**

- Software designed for calibration perfectionists with dual mode operation – wizard and expert mode, unlimited calibration settings, and advanced gray balancing.
- "Before and After" evaluation of your calibration results using your own images in full screen mode to focus on the details important to you.
- Display Analysis feature lets you evaluate and compare the performance of all of your laptop and desktop monitors.
- Multiple Monitor setup for laptop, desktop and front projector displays plus SpyderTune and StudioMatch, the expert option to match all of your studio displays.
